MORE ABOUT CAPTAIN ACID

After the United States of Acid and the Birds of Acid,
there is now a superhero who will save our planet.

Difficult times need great heroes.

Captain Acid is part of Acid utopia : ink makes things happen,
the ink in Captain Acid's veins can describe abstract shapes
and make them come alive,

And then give us a new perspectives for the future.

Black carbon heart, Ink in his veins
Ink on his hands.

Difficult times, years of silence.
And drawings come alive, Emerge, rise from the page.

And images spread, they fill hearts.
They stop destruction, They connect people.

«Art makes life better than art»
Ink—art—life, different words for one direction.

Délicatesse and elegance, respect and inclusion.
Responsibility and action : art for a possible future.

others have perfectly shown,
